About

Results-oriented frontend developer architecting and delivering responsive, high-performance web applications using modern frameworks. Skilled at translating complex UX/UI designs. collaborating with designers, backend engineers, and product owners in Agile environment. Passionate about continuous learning, exploring emerging web technologies. driving measurable, user-centric outcomes.

Experience

EFG Holding Hermes

June 2025 – Present

Frontend Developer | Angular

- Developed and implemented a localized (i18n) translation system for the SMEs finance platform, enabling seamless language switching and improving scalability across all front-end modules.
- Built and enhanced key financial modules including checks, installment, and payment management, ensuring accurate workflows and alignment with core business rules.
- Collaborated with backend and product teams to design financial data handling and validation logic, improving reliability and reducing user-side errors.
- Optimized UI components and data filtering for better performance and usability across complex financial dashboards.
- Ensured code quality, reusability, and maintainability through clean architecture and modular Angular design patterns.

Freelance

Nov. 2024 – Present

Frontend Developer

- Designed, developed, and maintained the frontend of diverse web applications including SaaS dashboards and marketing sites, serving 500+ daily active users.
- Delivered end-to-end solutions handling requirements gathering, coding, testing, and deployment.
- create responsive, mobile-first interfaces, achieving high uptime and user satisfaction.

Projects

E-Commerce Platform | *Typescript, Angular 17, Bootstrap, RxJS, Figma, Github, REST APIs, i18n*

- Developed a full-featured e-commerce web application with complete authentication flow including sign up, sign in, forgot/reset password, and session management.
- Integrated dynamic product listing, cart management, and multi-step checkout process supporting both cash and online payments.

Esnad | *Typescript, Angular 19, CoreUI, RxJS, ZoneJs, Figma, Github, Chart.js*

- Designed and developed the frontend for mawared system for Esnad pharmaceutical distributor to track marketing and sales team progress and currently used by +50 employees
- Implemented angular role-based access control in the UI, securing sensitive customer and sales data while simplifying the permissions matrix for administrators.
