About

Results-oriented frontend developer with three years of experience architecting and delivering responsive, high-performance web applications using modern frameworks. Skilled at translating complex UX/UI designs. collaborating with designers, backend engineers, and product owners in Agile environment. Passionate about continuous learning, exploring emerging web technologies. driving measurable, user-centric outcomes.

Experience

Fekratak

Jan. 2023 – Feb. 2025

Frontend Developer

- Architected and implemented scalable e-commerce applications using Angular, integrating payment gateways and real-time inventory updates to support 1,000+ monthly transactions.
- Optimized frontend performance by implementing code-splitting, lazy loading, and image compression, reducing initial load time by 40% and improving Lighthouse scores to 90+.
- Translated stakeholder requirements into detailed technical specifications and user stories, collaborating with UX/UI designers to validate prototypes and ensure perfect implementation.
- Mentored and guided a team of three junior developers through pair-programming, code reviews, and weekly learning sessions, resulting in a 25% reduction in bug rates and faster onboarding.

Freelance

Frontend Developer

- Designed, developed, and maintained the frontend of diverse web applications including SaaS dashboards and marketing sites, serving 500+ daily active users.
- Delivered end-to-end solutions handling requirements gathering, coding, testing, and deployment.
- create responsive, mobile-first interfaces, achieving high uptime and user satisfaction.

Projects

FlexIT Inventory | *Typescript, Angular 19, CoreUI, RxJS, ZoneJs, Figma, Github*

- Designed and developed the frontend of FlexIT inventory management system for GOAT-Clothes brand that is currently used across 2 branches.
- Built interactive dashboards with CoreUI charts and RxJS-driven data streams, boosting team productivity through data-informed coaching.

Mawared | *Typescript, Angular 19, CoreUI, RxJS, ZoneJs, Figma, Github*

- Designed and developed the frontend for mawared system for Esnad pharmaceutical distributor to track marketing and sales team progress and currently used by +50 employees
- Implemented angular role-based access control in the UI, securing sensitive customer and sales data while simplifying the permissions matrix for administrators.

Technical Skills
